Back

Use the cable to connect your citb to your device.

In case you need more power, connect a here a 5V charger.

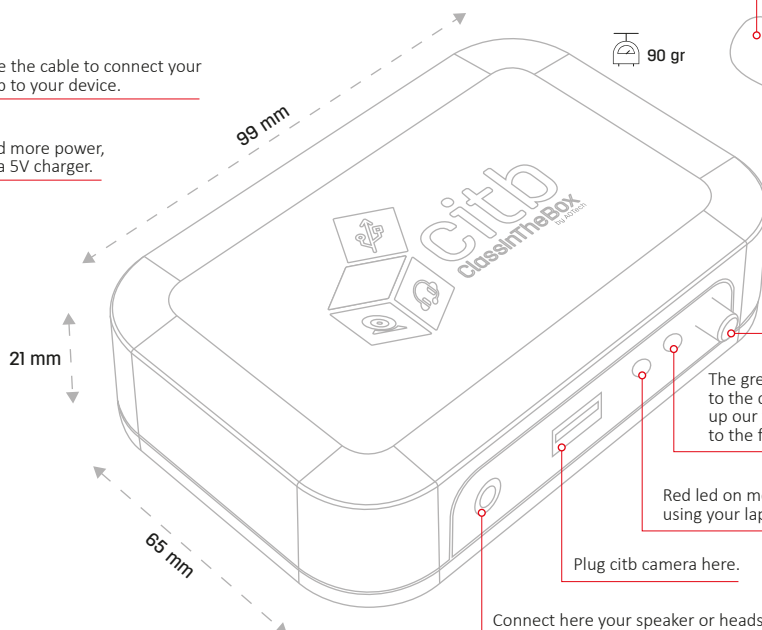

The wireless microphone allows you to move freely within a radius of 20 metres. It incorporates ambient noise reduction, allowing you to hold a conversation anywhere, with high audio quality.

90 gr

The citb camera features 2K resolution, manual focus and a ultrawide lens for exceptional image quality.

Front

Change the camera image, when red light is on you are using citb camera!

The green led indicates that Class In The Box is connected to the computer correctly. Our wireless microphone picks up our voice, and the active video signal corresponds to the front camera.

Red led on means you are using citb camera, otherwise you are using your laptop camera.

Plug citb camera here.

Connect here your speaker or headset.

“Compatible with Windows, Mac, Linux Chromebook”
